Summary Statement

I am a moral psychologist, statistician and philosopher at the Social Psychology Lab in Ghent University. My primary research focus is the study of moral psychology. I am particularly interested in exploring how people react to real-life moral dilemmas. Additionally, I study the nature of blaming and praising. I am a big proponent of transparency in science and aim to make my research and data as accessible as possible. As such all data and statistical code for my studies are made available through Open Science Framework (individual links available on dhibostyn.com).
